Portfolio Leetcode Linkedin github

Summary

Software Engineer internship and project experience in LLMs, LangChain, LangGraph, RAG, and agentic AI. Skilled in Python, FastAPI, React, machine learning, and AI-integrated application development. Eager to contribute technical skills, learn from experienced teams, and support the organization in building reliable and effective AI solutions.

Education

Gandhi Institute Of Engineering and Technology, Odisha **Oct 2022 - Apr 2026**
B.Tech in Computer Science and Engineering *CGPA: 8.40*

Hi-Tech Higher Secondary School, Odisha **Mar 2021 - Mar 2022**
Intermediate (BSE) *Percentage: 80.8%*

Experience

Sonydig Technology Pvt. Ltd. | *Full-Stack AI Engineer Intern, Bhubaneswar* **Dec 2025 - May 2026**

- Developed AI-integrated e-Office features for chatbot assistance, OCR-based document retrieval and RAG-enabled information access, reducing document retrieval time by 60% across Invoices and Govt. documents.
- Integrated OCR-based document processing and retrieval workflows to improve document accessibility by 60%, while leveraging diffusion models for AI-powered visual and diagram generation.
- Led website design and development in consultation with Dr. Devjani Bhuyan, OAS, translating stakeholder requirements into website architecture, UI design, and archaeological site presentation for 5000+ unique visitors.
- Integrated archaeological site latitude and longitude coordinates and implemented PHP backend functionality and MySQL data validation to support 150+ structured records and accurate geographical representation.

VanurTech Media Pvt. Ltd. | *MERN AI Developer Intern, Bhubaneswar* **May 2025 – Jun 2025**

- Developed a React-based Learning Management System (LMS) using the MERN stack, building 20+ reusable UI components while learning TypeScript and cloud technologies to improve development efficiency by 30%.
- Developed 10+ RESTful APIs using Node.js and Express.js to support LMS workflows and frontend-backend integration.

Projects

DevOpsGraph: Production Fault Analysis | *React.js, CognoDB, Socket.IO, Docker* **Deployed** **Aug 2026**

- Developed a graph-based DevOps architecture to model service dependencies, deployments, and cloud-native resource relationships, enabling AI-assisted root-cause investigation and counterfactual blast-radius analysis, reducing incident resolution time by 40%.
- Built an AI Investigator to trace dependency paths and identify potential production failure causes, integrating interactive visualization and real-time communication to improve diagnostic accuracy by 35%.

Auto Insurance Fraud Claim Detection | *NumPy, Python, PyTorch, JSON, Streamlit* **Github** **June 2025**

- Built an end-to-end machine learning pipeline using a Random Forest classifier with balanced class weighting, achieving **88.42% accuracy and 0.96 ROC-AUC** on imbalanced insurance claim data.
- Engineered data preprocessing with feature selection, date handling, one-hot encoding, and feature-column alignment to process 150+ archaeological records into model-ready features, increasing data throughput by 25%.

Customer Refund Management Using Agentic AI | *React.js, MongoDB, JWT, LangGraph, RAG* **Github** **Mar 2026**

- Developed a full-stack AI customer support platform using LLM agents and RAG to automate refund eligibility checks and customer conversations, achieving a 60% increase in document retrieval speed.
- Integrated voice workflows using Groq Whisper STT and ElevenLabs TTS, with WebSocket-based real-time monitoring of agent execution logs.

Technical Skills

Languages: Python, C, SQL, HTML, CSS5, JavaScript, Linux, Java
Frameworks/Libraries: NLP, LLM, LangChain, React.js, LangGraph, React.js, Express.js
Databases: PostgreSQL, MongoDB, Redis Cache, Graph Databases, Vector Databases
Tools & Platforms: Git, GitHub, Docker, Postman, AWS (EC2, S3, IAM), GCP
Concepts: RESTful APIs, MVC, ML Flows, JWT, JSON, Embedding, Agentic Automation, RAG, Networking
Academic Coursework: SDLC, Agile, System Design, OOPs, DSA, DBMS, Collaborative Team, CN

Achievements & Certifications

- Wipro Certified Java Full Stack Development, Java Full Stack 8 Course, I have solved 400+ leetcode questions.
- I was selected for final group in **Learnathon** for the project **Auto Insurance Fraud Claim Detection**
- **Google Cloud Arcade – Achievement (2025) Level 1** - Google Cloud
- Served as a Java and Machine Learning trainer for the university's Code Communicators Club.
- **Best Team Management Award:** NSS Blood Donation camp and Annual Feast Management.
